

BrainPOP Science

Description

BrainPOP Science (Gr. 6 - 8) is a new, powerful, student-driven science experience.

This Subscription is available to Enrolled and Flex families.

Empower your middle school student to do, discuss, and analyze real science through:

- Inquiry-based scaffolded investigations ignite student curiosity as they examine phenomena, collect evidence, and check for understanding along the way.
- Virtual science and engineering practice that is student-led guided discovery while building analytical and critical thinking skills. This is done using 3-D worlds, data manipulations, and simulations.
- Students learn to use an intuitive claim-evidence-reasoning process to gather, edit, and organize evidence through the investigation process.
- Gain real-time actionable insights and data into how students are really learning with investigations and unit-level assessments.

Logging in to the Subscription

BrainPOP Science is a teacher-led Subscription. You should contact your support teacher to set your student up in a classroom.

When logged into your BrainPOP account, you can access BrainPOP Science by scrolling to the bottom of the page and selecting BrainPOP Science from the list of available Subscriptions.

1. Log in at <https://www.brainpop.com/science/>.
2. Choose the "Log in" button at the top right of the page and choose "I am a kid" from the drop-down

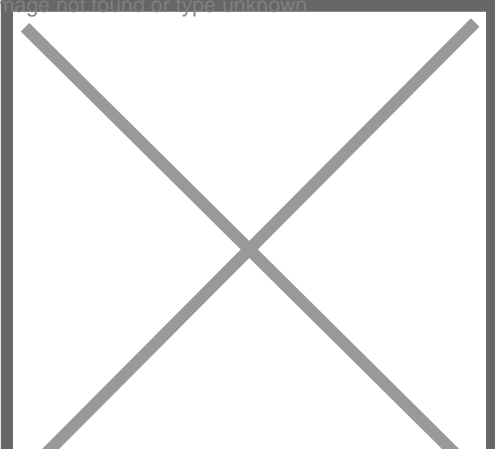

3. The first time you log in, choose the “Have a class code?” button in the bottom right of the screen.

6. The second time that you log in, repeat #1 and 2.
7. Then, enter your username and password and select “Log in.”

Using the Subscription

Your support teacher will assign work for your student to complete. Follow the instructions and read the information to complete the assignment. Enjoy!
