

Kindergarten Curriculum Picks

Picks can be purchased from [Anchor Academic](#) (using your PO#) or from one of our [comprehensive vendors](#). Other options, such as borrowing from the [Learning Commons Search Portal](#) or [Sora](#) virtual library or purchasing from our [Used Bookstore](#), may also be available.

Vendor websites are pick-and-choose, and some optional or alternate suggestions may be listed, so carefully select your items.

Overview Of Kindergarten Curriculum Picks

Here is an overview of the curriculum picks that we suggest for Kindergarten. Please note that some subjects provide more than one option. For more information about the curriculum, please refer to the information under [Detailed Information for Kindergarten Curriculum Picks](#) (further down the page).

Phonics/Reading/Printing Skills	<ul style="list-style-type: none">• All About Reading Pre-reading Basic Package OR Level 1 with Interactive Kit; Handwriting Without Tears Letters and Numbers for Me Workbook; Stamp and See Screen <p>OR</p> <ul style="list-style-type: none">• The Ordinary Parent's Guide to Teaching Reading; Fun With Letters Magnetic Activity Set; Explode the Code A, B, and C

Detailed Information for Kindergarten Curriculum Picks

Phonics/Reading/Printing Skills

Option 1: All About Reading Pre-Reading Basic Package OR Level 1 with Interactive Kit; Handwriting Without Tears Letters and Numbers for Me Workbook; Stamp and See Screen (optional)

Option 1a: All About Reading Pre-reading Basic Package OR Level 1 with Interactive Kit

Important Note: Level numbers on these books don't refer to grade levels. Lessons are mastery-based, not grade-level-based. This means that students are placed where they are ability-wise, not according to age or grade level. Please refer to the Pre-reading Readiness Checklist and Level 1 Placement Test below. If you select Level 1 with Interactive Kit, please note that the Interactive Kit can be reused for subsequent levels.

Description of Pre-Reading: The All About Reading Pre-reading program is designed for preschoolers and kindergarteners. Your student will enjoy the special games, crafts, and storytime read-alouds, and you will love the way your student effortlessly learns essential pre-reading skills. Your student will learn five very important pre-reading skills: Print Awareness, Phonological Awareness, Letter Knowledge, Listening Comprehension, and Motivation to Read.

Description of Level 1: Students will be actively involved in the learning process. This is a multisensory program; your student will learn through sight, sound, and touch. Everything is taught in context, and your student will apply what he has learned right away. Your student will be engaged in thinking, processing, comparing, and learning. There are five key components of reading—and this program teaches all of them thoroughly:

- Phonological Awareness
- Phonics and Decoding
- Fluency
- Vocabulary
- Comprehension

Mathematics

Math U See is not mentioned here simply because it is not available from our Curriculum Pick provider(s), although it is a strong option, especially in the primary grades. Math-U-See can be ordered directly from the Canadian Distributor, [Math Canada](#). Place an order by Phone: 250-590-6761 or Toll-Free: 1-888-854-6284.

Option 1: Math Lessons for a Living Education K

Description: Designed to engage students through exciting stories, teach them how to apply mathematical concepts through everyday life situations, and allow them to learn smarter instead of harder.

- Learn to count to 10 and numbers 0-10
- Develop critical thinking skills and build stamina
- Make connections to their world by noticing basic patterns, shapes, and concepts of time

This book was written to be used by you and your young students together. It begins the story of a twin brother and sister as they interact with their family, friends, and town. They make connections in life and find it full of learning opportunities! Students will learn about counting, basic shapes, opposites, positional words, graphing, and more. They will also learn about the weather, nature, and how unique God created them to be. Features:

- A Charlotte Mason flavour to math for today's student
- Convenient daily schedule — saving you lesson prep time
- Short, engaging 15-30 minute lessons
- An instructional blend of stories, copywork, oral narration, and hands-on experience to bring concepts to life

Option 2: Singapore Math 2022 Edition KA and KB Student Books and Home Instructor Guides

Description: epitomizes what educators love about the Singapore math approach, including the CPA progression, number bonds, bar modeling, and a strong focus on mental math. It's a no-fuss, straightforward program that balances supervised learning and independent practice. The recently released Primary Mathematics 2022 Edition uses the same approach as previous Primary Mathematics editions, but features entirely new content and lesson structures.

Additional Support: [Singapore Math Live](#) offers instruction, encouragement, and support for parents and students

Option 3: Jump Math New Canadian Edition Kindergarten

Description: This program accommodates diverse student needs and abilities with an embedded review, the scaffolding of concepts, careful use of language, and opportunities for continuous assessment and practice. The New Canadian edition of AP Book 1 is printed in two parts, Book K.1 and Book K.2. In order to cover the full curriculum, students will need *both* parts. In conjunction with the Teacher Resources, Book K is designed to cover the curriculum for Kindergarten mathematics, with units on:

- Number Sense
- Patterns and Algebra
- Geometry
- Measurement
- Probability and Data Management

“ **Note from Curriculum Consultant:** The multi-modal approaches to solving math problems presented in this resource can be a benefit to some students, but other students may find this approach confusing and would be better served with a program that presents a consistent approach to solving problems.

Multi-Subject

Come Sit by Me Volume One

Description: This resource is a Canadian picture book unit study that uses literature as a launch point for learning activities. You and your student spend one week on each book, reading the book each day, followed by your choice of the dozen or more activities. The suggested activities are listed for all subject areas, from math to music, science to social studies and many in-between. Each book study has one or more connected Bible stories as well as a related memory verse. Suits multi-level teaching.

“ **Note from Curriculum Consultant:** This resource addresses standards in ADST, Art, Bible, English, Health, Science, and Social Studies; additional math and phonics instruction required. It is suitable for multi-grade teaching of students in Kindergarten through Grade 2. Come Sit by Me book packs, each including one-quarter of the required literature books, are available to borrow via the HCOS Learning Commons Search Portal.

Here are a few books that align with the content areas of BC's curriculum which you may choose to purchase and have on hand in case you experience a delay in borrowing some of the 36 books used in this unit study:

1. A Team Like No Other (G. Graham)
2. Baseball Bats for Christmas (M. Kusugak)
3. Bone Button Borscht (A. Davis)
4. Franklin Rides a Bike (P. Bourgeois)
5. Hannah's Collections (M. Jocelyn)
6. Jessie's Island (S. McFarlane)
7. My Arctic 1,2,3 (M. Kusugak)
8. Sandwiches for Duke (J. Sadler)
9. Stella, Queen of the Snow (M. Gay)
10. The Auction (J. Andrews)
11. The Moccasin Goalie (W. Brownridge)
12. The Sugaring Off Party (J. London)

Science

Intro to Engineering Science Kit

Description: Intro to Engineering welcomes young children to the field of engineering with 21 experiments and building projects in five sections. Start by learning some engineering basics with experiments on levers, forces, and pulleys. Build simple devices using these basic components. Move on to explore engineering on land by building vehicles with wheels, such as a race car and a wind-up car. Next, investigate engineering with air (and in the air) by building a helicopter, a pinwheel, a parachute, a glider, a balloon rocket, and an air-powered carousel. Then, build a diving bell, a sailboat, and a paddleboat to experiment with engineering in water. Finally, find engineering in your own home with experiments modelling the telephone and television. Includes a 48-page guidebook.
