BrainPOP

BrainPOP (K-Grade 8) is an educational platform with animated videos and engaging resources. BrainPOP can be used to support learning in seven main subject areas: Science, Social Studies, English, Math, Health, Arts & Music, and Engineering & Technology.

There are three resources for different grade levels:

BrainPOP Jr. (K-Grade 3) uses animated videos, games, and interactive activities to engage learners, and support different learning styles.

BrainPOP (Grades 4-6) combines animated videos, games, quizzes, and hands-on activities to build critical thinking, literacy skills, and student engagement.

BrainPOP Français and BrainPOP Español (Grades 4-8) is designed for fluent French and Spanish speakers, not language learners.

> This subscription is not available to HCOS Registered students.

Logging In

There are two account options for logging in with BrainPOP: the "Shared" or "Individual" account.

Does My Child Need a "Shared" or an "Individual" Account?

BrainPOP: Shared Login vs. Individual Accounts

HCOS provides access to BrainPOP through our school subscription. There are two ways to use BrainPOP, depending on what you want to do.

Shared School Login

The shared HCOS BrainPOP login provides quick access to BrainPOP content without requiring users to create a personal account.
Use the shared login when you want to:

- Browse BrainPOP topics and resource
- Watch BrainPOP videos
- Explore activities connected to a topic
- Use BrainPOP for general learning or research

Think of the shared login as: Access and Explore.

This is often all that is needed for parents, students, or teachers who simply want to use BrainPOP resources.

Individual Student Accounts

Teachers can also create an individual educator account and set up classes in BrainPOP. Students can then join the teacher's class using a class code and create their own individual accounts.
Individual accounts allow students to use additional BrainPOP features, including:

- Working on teacher assigned activities
- Submitting and saving student work
- Viewing student results and progress
- Keeping a record of completed assignments
- Accessing features that require an individual account (Make-A-Movie)

Think of individual accounts as: Work, Save, and Track.

Which option should I use?

Just looking for a BrainPOP video or resource? Use the HCOS shared login.

Want students to complete BrainPOP activities and have their work connected to their teacher? Create an individual student account by joining your teacher's class using a class code.

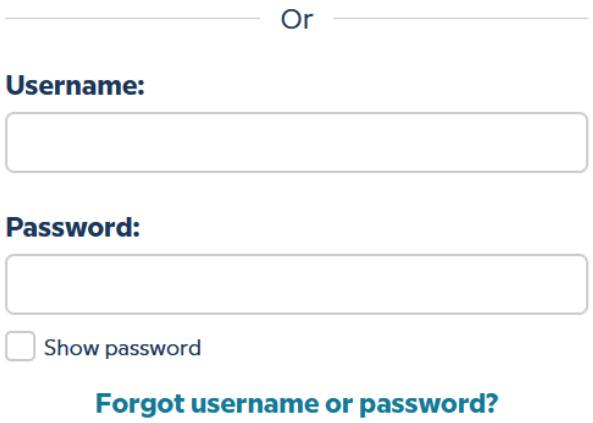

Logging in to the Shared Account

There are three steps to log in to the BrainPOP shared account.

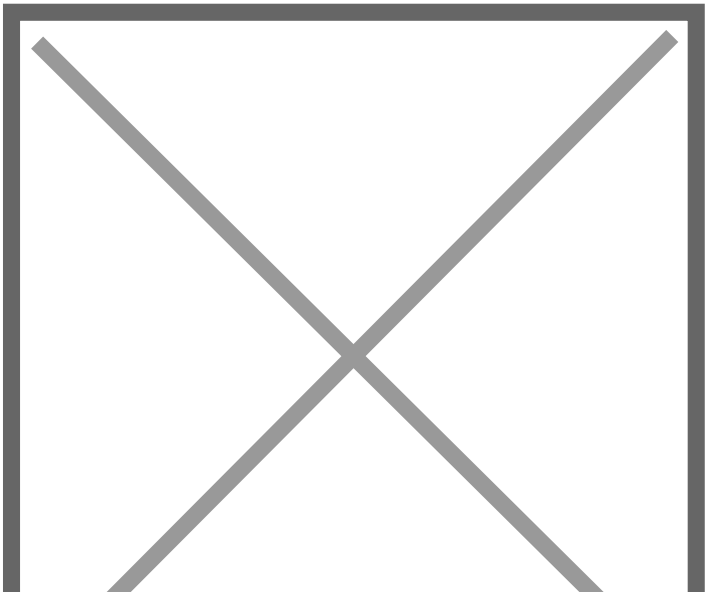

Step 1: Navigate to BrainPOP and click the "Log In" button in the top right corner.

Step 2: Enter the username and password for BrainPOP from the Subs/Passwords tab in the Search Portal. If, at this point, you get an error message saying that the username and password do not match, clear your browser history/cache and try again.

Step 3: Select “Keep using a shared account” at the bottom of the screen.

> Student work is **not saved** when using the shared account.

Setting Up an Individual Student Account

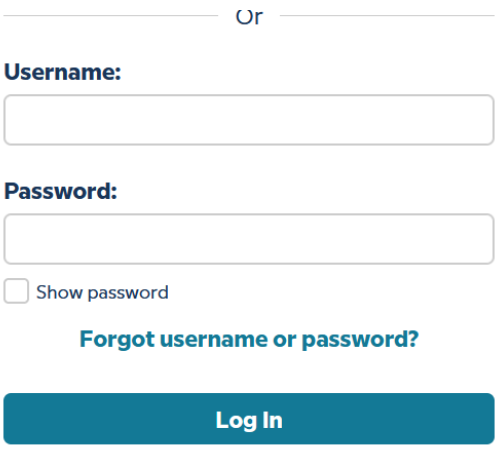

There are four steps to log into the BrainPOP individual student account set up by your teacher.

Step 1: Contact your support teacher and request a BrainPOP code.

Step 2: Navigate to BrainPOP and click "Log In" in the top right corner.

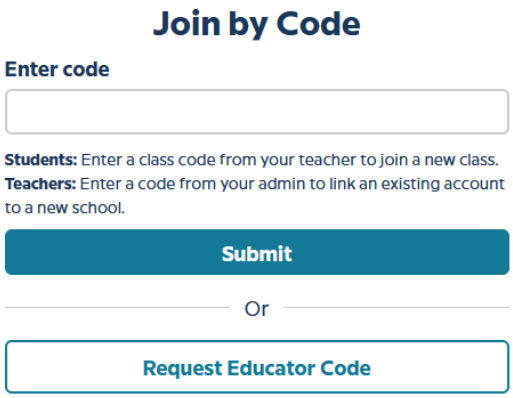

Step 3a: Your teacher may have sent you a username and password. If they have, please enter it here and select the "Log In" button. **Go to step 4. OR** If your teacher has sent you a code, go to Step 3b.

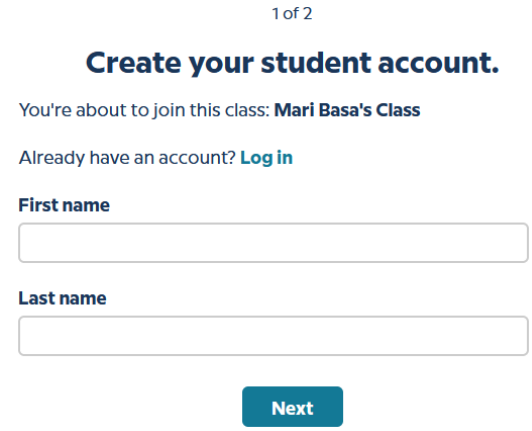

Step 3b: If your teacher has sent you a code select the "join by code" tab at the top right of the page.

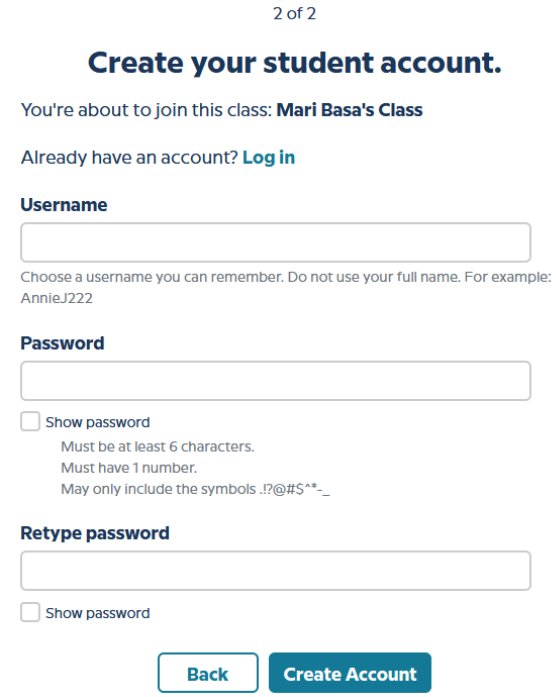

Step 3c: Enter the code that your support teacher sent you. Select "Submit."

Create your student account and select "Next."

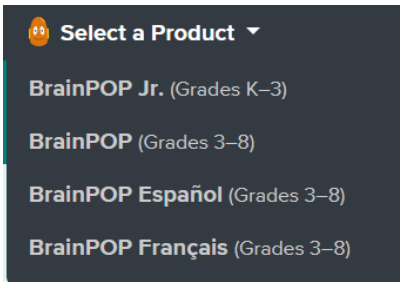

Create your username and password. Select "Create Account."

Step 4: Use the "Log in" button at the top right for all future visits. If you receive an error message, re-enter your password.

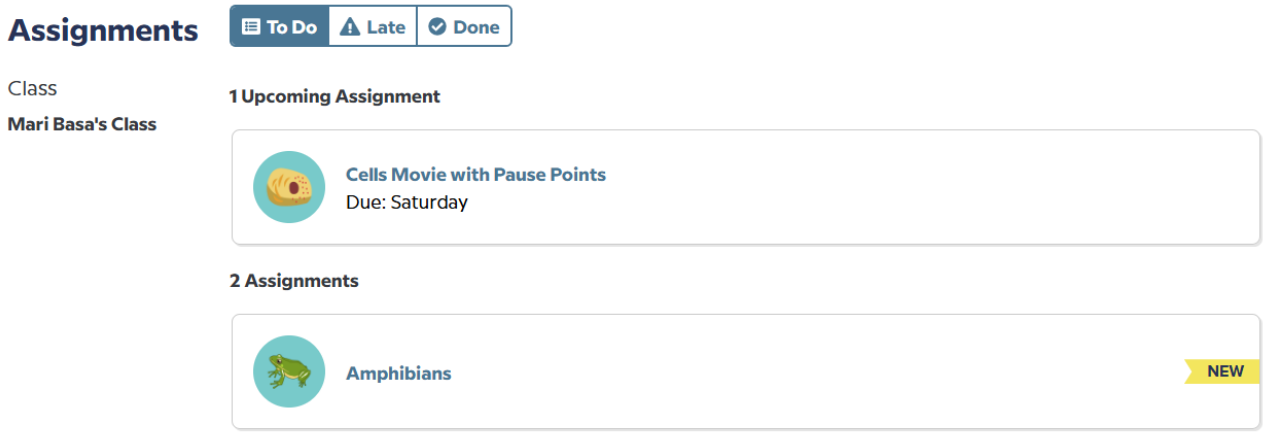

Step 5: If your teacher has assigned work, you will see it here. If you do not see an assignment, select the "Select a Product" button at the top left of the page, and choose a Subscription to work independently.

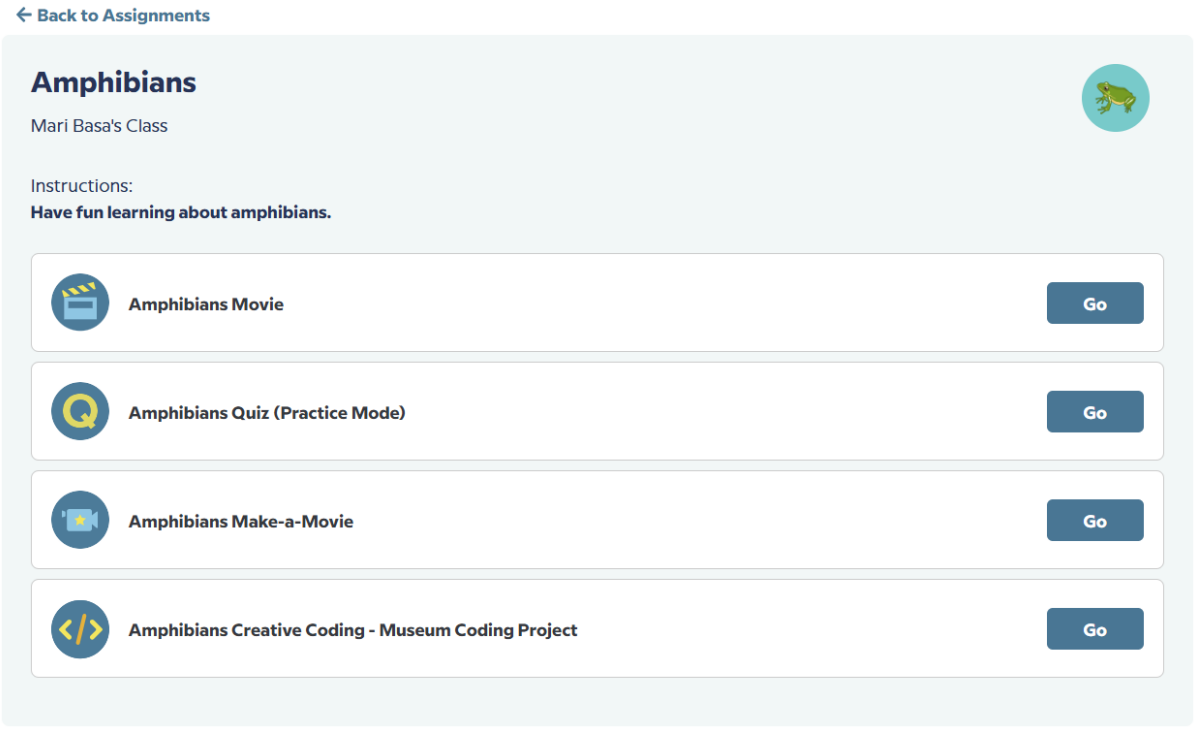

Finding Assigned Activities

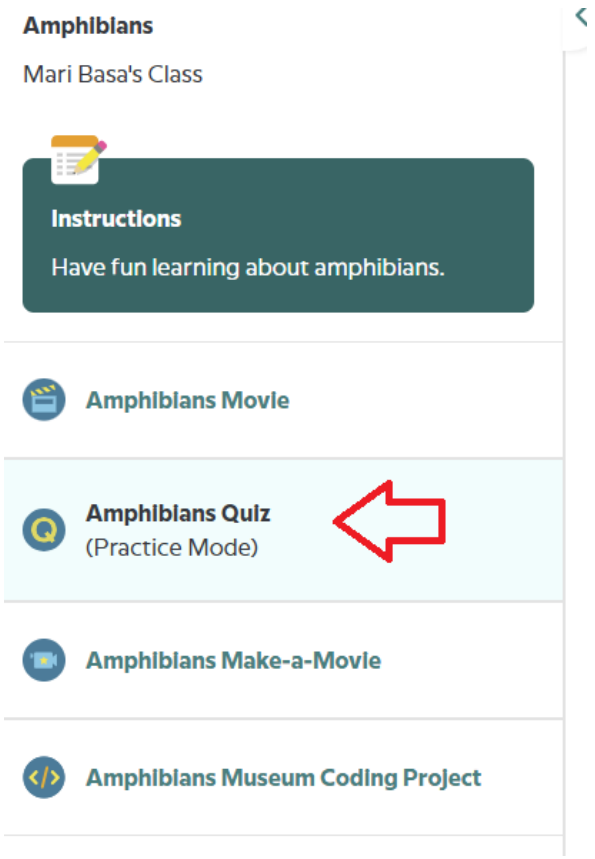

1. Students can select an assignment.

2. Four activities have been assigned below.

3. Printable worksheets can be found in the student account after a quiz activity has been selected.

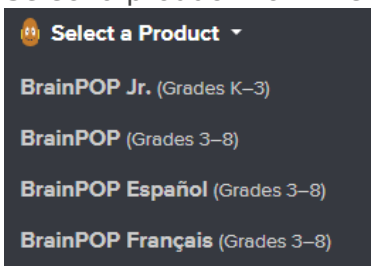

4. After the activity is selected, an activity sheet is found at the top right of the page under the printer button.

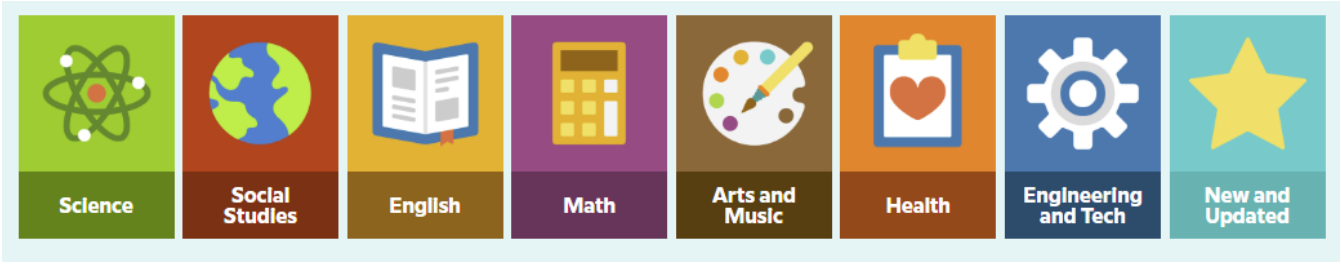

Using BrainPOP Independently in Your Teacher's Classroom

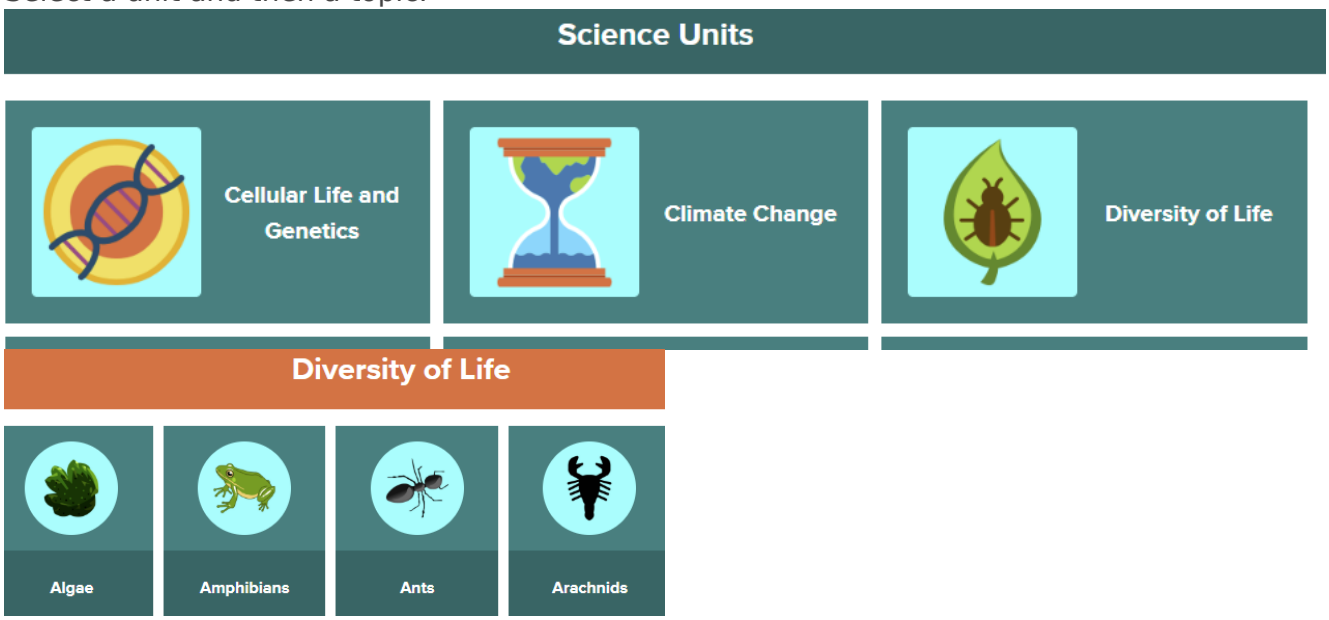

Select a product from the top left of your student's account.

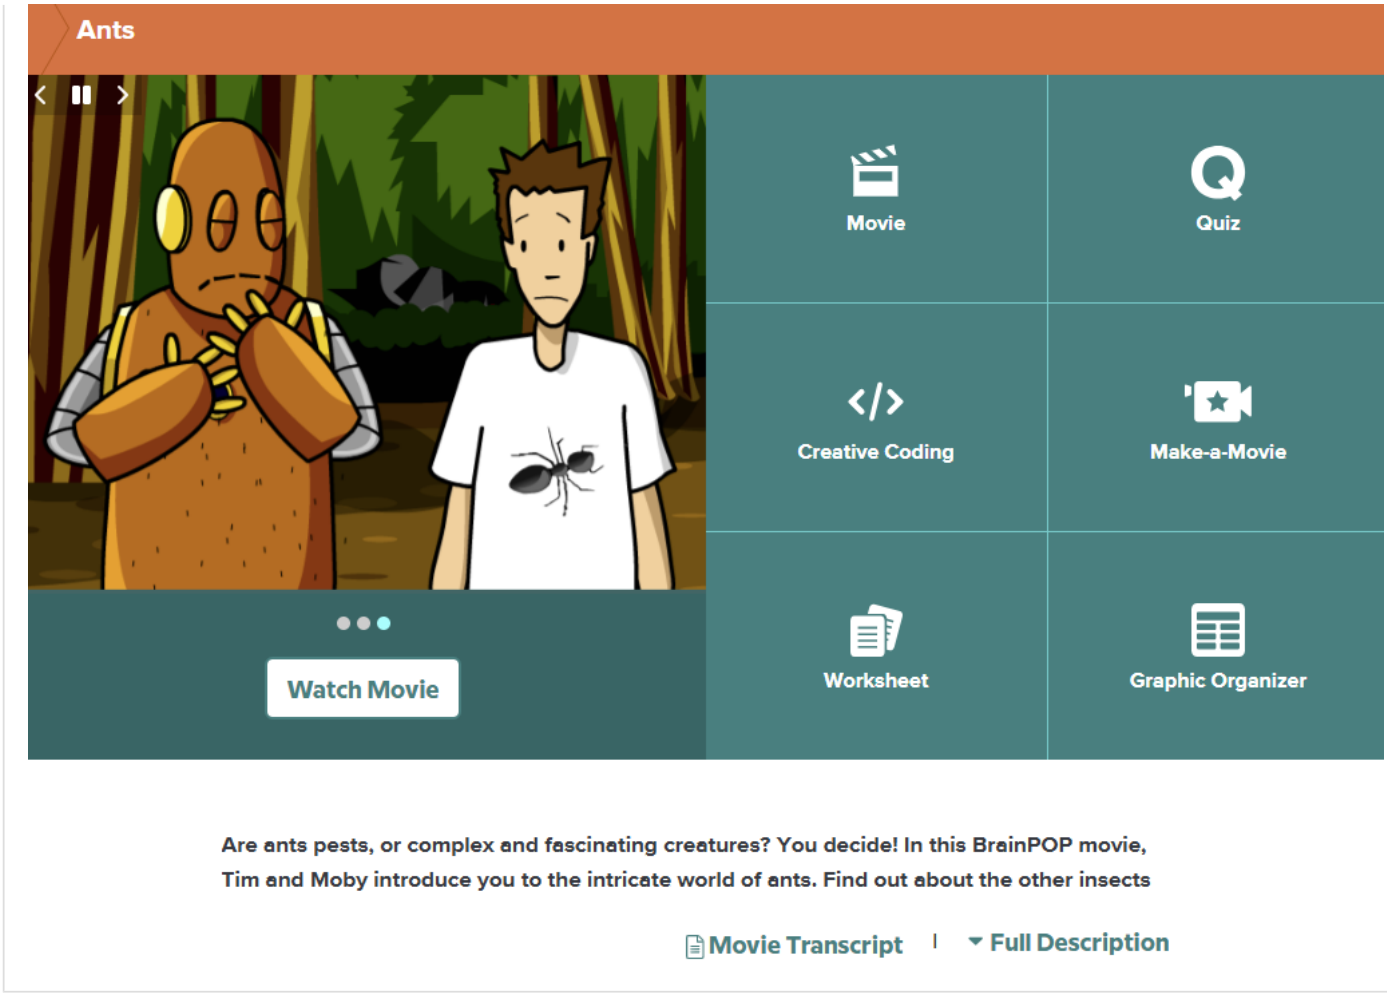

Select a subject.

Select a unit and then a topic.

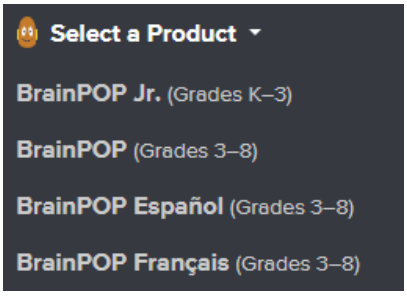

Selecting a topic generates the activities page where worksheets and activities are found.

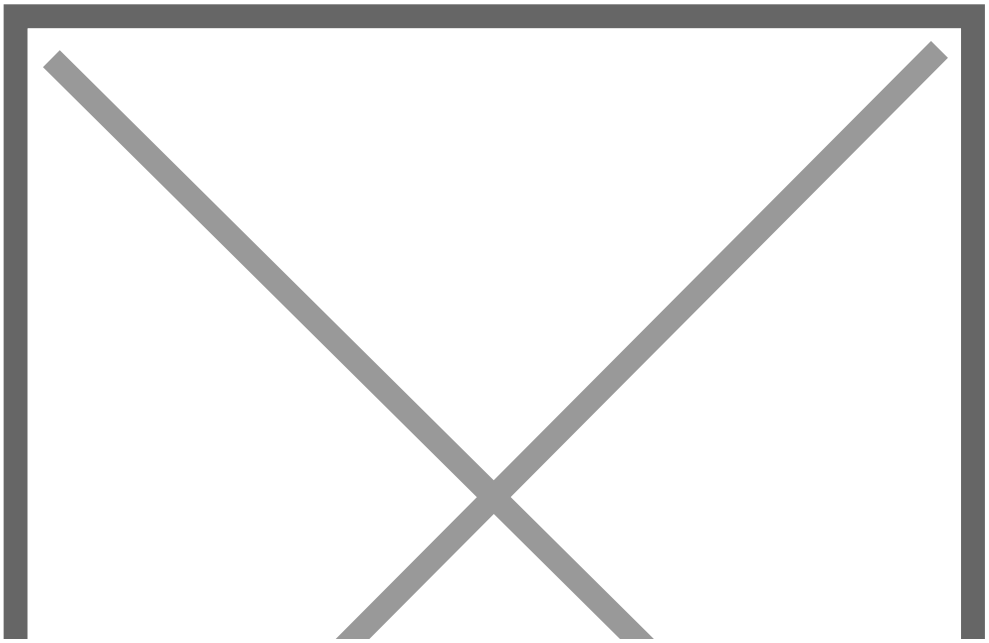

Navigation & Use

https://www.youtube.com/embed/70VOJLZNlpM

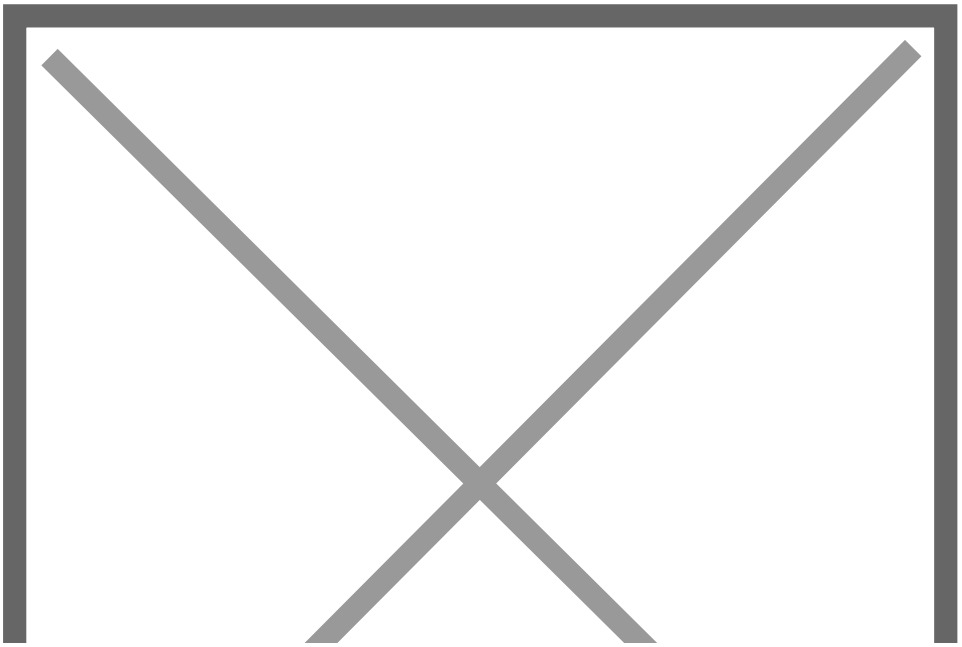

Begin by selecting a product from the top left of the page.

Students can select a specific subject, unit and topic, or “Today’s Topic.”

Once a topic is selected, explore the available resources.
