Learning the Times Tables

Yes, Mathletics teaches the times tables through various methods, including a space-themed game called **Multiverse**, interactive activities, and printable worksheets. It utilizes a combination of engaging content, such as the **Multiverse game**, curriculum-based activities, real-time challenges, and practice materials, to help students master multiplication facts.

When a student is logged in, select the "Games" button from the top menu bar.

Choose the "Multiverse" button to allow the student to play a space game using the times tables.

Times Table Review can also be found in the downloadable workbooks accessed through the parent account described above, starting in Grade 3 with "Multiplication and Division."

Revision #21
