

Tynker

Tynker (K-Grade 10) teaches coding as students create games and animated projects. Students gain a solid foundation in programming and computational thinking, which prepares them to transition to any mainstream object-oriented programming language. After learning the fundamentals, students can transition to JavaScript or Python within the Tynker learning system.

HCOS Enrolled students who wish to receive teacher-guided instruction in Tynker can email Mr Mark Lamden for more information about enrolling in the online ADST: Levelled Coding module. Check with your support teacher for Mr Lamden's contact information.

Tynker courses include:

- Icon coding 7-Course Pack, Space Cadet and Dragon Spells, Programming 1A and 1B
- Programming 100, 300, Barbie, You Can Be Anything
- Programming 101, 102, 201, 202, 301, 302
- JavaScript, Python, Web Development 101
- Drones 101, WeDo Coding, Augmented Reality, micro: bit 101 and MicroPython 101

This subscription is not available to HCOS Registered students.

Logging In

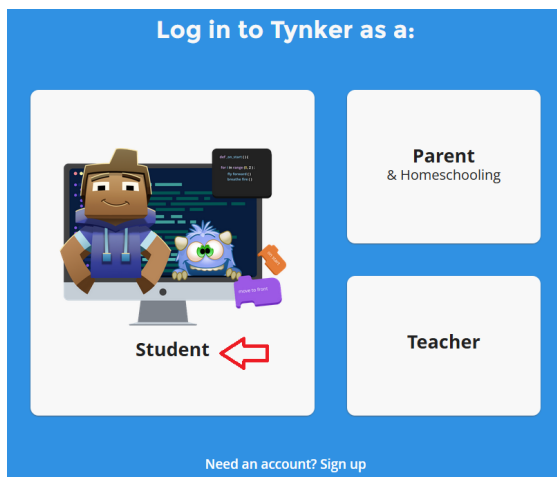

There are seven steps to log in to Tynker.

Step 1: Email Margaret Basaraba for help setting up an account. If your students already have a Tynker account, you can email Margaret Basaraba to ask for additional classes to be added to their account.

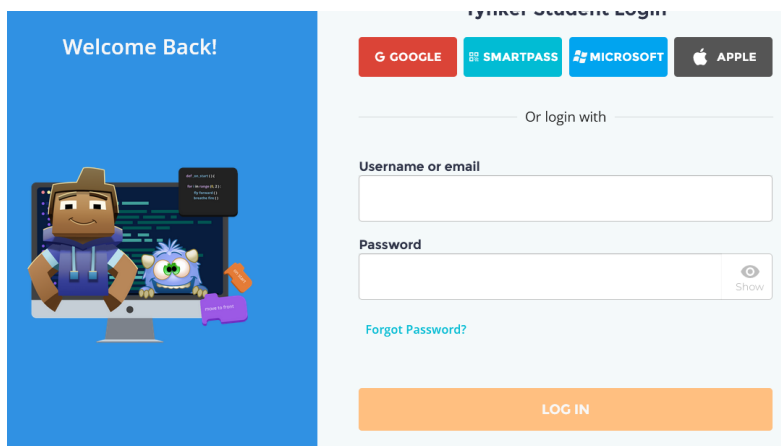

Step 2: Navigate to [Tynker](#) and select "Log In" from the top right corner.

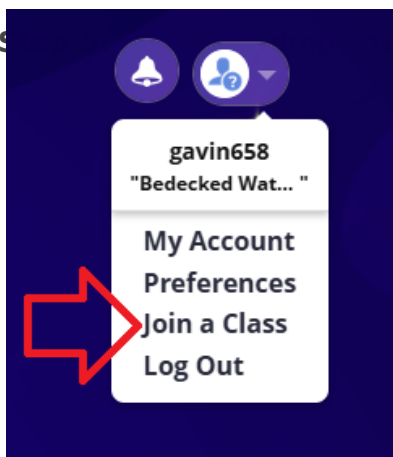

Step 3: Select "Student."

Step 4: Enter the username and password provided by Margaret or your support teacher, then click the orange "Log in" button.

Click the user profile icon in the top right corner of the page and choose "join a class."

Step 6: Enter the class code provided by Margaret or your support teacher.

Join a New Class

Ask your teacher for a class code and enter it here to join the class.

Step 7: Choose the course you wish to enter by selecting the picture.

The image shows three course selection cards on a dark purple background. Each card features a colorful illustration and text. Below the cards are three buttons: PROJECTS, WORKSHOP, and COMMUNITY.

- Programming 1A:** Beginner · 12 lessons assigned
- Dragon Spells:** Beginner · 10 lessons assigned
- Hour of Code:** All Levels · 15+ Coding Puzzles · 25+ Coding Projects

Navigation & Use

Completing Lessons

Each lesson will be brightly lit before it is completed. There will be many steps inside the lesson to complete it. Select the picture to open the lesson.

The image shows four lesson selection cards, each represented as a television set with a glowing screen. Each card has a title and a small illustration.

- Lesson 5: Dragon Scrolls**
- Lesson 6: Ancient Spells**
- Lesson 7: Catch Me If You Can**
- Lesson: The Long F**

As each lesson is completed, it will be grayed out.

As you start each lesson, you will see locks on each of the parts of the lesson that are not completed. Tynker will move you through each of these steps. When the lesson is complete, all the locks will be gone, and only numbers will remain.

To log out during a lesson, select "Replay." Go to the top right and select "log out."

A progress bar will appear if you have only partly completed a lesson.

Students can repeat previous parts of a lesson by selecting an earlier number.

Students can move forward to a new lesson by selecting the gray arrow by the Tynker logo in the top left corner.

All of the numbers will be shown when a lesson is complete.

Sound can be turned off by selecting the three dots at the top right corner and then toggling the "Sound" switch.

Revision #25
